

2000 Watt Charger/Inverter

During a recent visit to lazy days RV center i had several items repaired which was done under my extended warranty they included the inverter which i found out later had nothing wrong with it so i brought the inverter home with me. I have no use for the extra inverter and would like to sell this extra inverter i am asking \$900.00 shipping not included. The best price for a 2000 watt charger/inverter you will find.
